UBRP Application AI Policy

You are the best person to tell your story

The Undergraduate Biology Research Program (UBRP) Selection committee reviews each personal statement to better understand every applicant's unique experience and reasons for applying to UBRP. Successful applicants use their personal statements to articulate their experiences and story, giving rise to a voice that is genuine and uniquely theirs.

In light of this, UBRP has established guidelines for use of AI platforms or text-generating software for the completion of our application.

Guidelines:

- Use of AI for generative writing is prohibited.
- Use of AI to review grammar & spelling is permissible.
